

Marker ID 0

DICT_4X4_50 | STK-14 Cage Row Vision reference marker

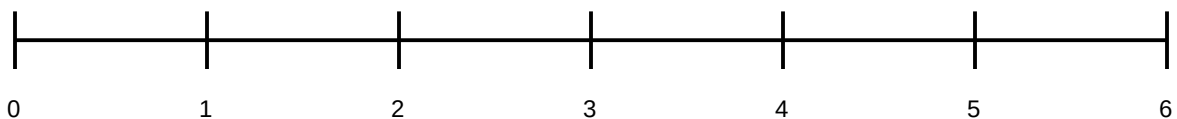

Black square = 3 in. Print at 100% / Actual size - NOT fit to page.

Measure the printed black square and put that value in config.yaml (markers.size).

Keep at least 1/2 in of white paper around the black square if you trim the page.

Tick marks point to the marker CENTER - that is the point to measure for markers.positions.

This bar must measure exactly 6.00 in. If it does not, printer scaling is on.
